

As many uses as there are fish in the sea!

Coral Calcium with ConcenTrace® and Liquid Coral Calcium Extra

Coral Calcium with ConcenTrace® contains a highly absorbable form of every mineral needed by the body.† When the minerals in coral fulfill a specific mineral deficiency, a specific health condition is improved.

Ecologically Safe. Trace Minerals Research provides only pure petrified coral calcium that is ecologically safe. None of the coral calcium we use comes from live coral; all the coral is harvested from petrified coral that has been washed up on shore.

One of the most pH balanced trace mineral coral calcium formulas available.† ConcenTrace® Trace Minerals Complex

comes from the pristine shores of the northern and isolated part of the Great Salt Lake and is concentrated 50 times that of ocean water. ConcenTrace® Trace Minerals Complex is the best form of trace minerals available because of its concentration, balance, and pH level.† ConcenTrace® has a balance like that of a perfect blood plasma. Combining coral calcium that has a good pH with ConcenTrace's pH provides you with a winning combination.

Coral Calcium has a good trace mineral base, but is not sufficient alone.

Combining ConcenTrace® Trace mineral complex in ionic form with Coral Calcium from Okinawa, Japan provides one of the best pH balanced trace mineral Coral Calcium

formulas available.† No other company offers that benefit.

Not only are you getting the best Coral Calcium formula available, but it is backed by our guarantee of Feel the Difference or Your Money Back, no questions asked.
